Diagnostic and Interventional Cardiology

Dr. Chandel

March 8, 2000

RE: DR. ASHUTOSH CHANDEL

To Whom It May Concern:

I had the opportunity to supervise Dr. Chandel's training in nuclear cardiology between July '90 and August '91. During this time frame, Dr. Chandel was involved in more than 500 nuclear cardiac studies, including SPECT imaging and multigated acquisition imaging. These studies included rest and stress imaging, as well as rest and stress MUGA scanning, as described. My clinical experience with Dr. Chandel included the clinical evaluation of these patients before and after cardiac testing, as described. In addition, specifically he was involved in manipulation and interpretation of nuclear images.

At the end of this time frame Dr. Chandel had accumulated more than 500 hours of experience in the diagnostic ordering, acquisition, interpretation and therapeutic analysis for nuclear cardiology involving exercise and pharmacologic stress testing with SPECT imaging, as well as exercise and rest MUGA scanning. In that regard, he is clinically competent in the interpretation of these studies.

If you should have any questions, please do not hesitate to call.

Sincerely,

David R. Sease, M.D., F.A.C.C.
