Subject: Amendment to USA/9296/B(U)-96 for Addition of Se-75 as Authorized Contents

Dear Mr. Nelson:

QSA Global Inc. requests review of our application submitted 20 October 2005 to allow shipment of Se-75 as special form capsules up to a maximum activity of 150 Ci. This supportive documentation and justification for this amendment request is contained in Revision 6 of the SAR which was included with our 20 October 2005 application for this transport package.

We had intended this change for incorporation during the last renewal of this certificate though it was not clearly noted in our transmittal documentation. At this time, we would appreciate any assistance you could give to process this request expeditiously. Should you have any additional questions or wish to discuss this submission prior to our response, please contact me as shown below.

Sincerely,

Lori Podolak
Product Licensing Specialist
