

February 14, 2006

Mr. Christopher M. Crane, President  
and Chief Executive Officer  
Exelon Generation Company, LLC  
4300 Winfield Road  
Warrenville, Illinois 60555

SUBJECT: BRAIDWOOD STATION, UNITS 1 AND 2; BYRON STATION, UNITS 1 AND 2;  
CLINTON POWER STATION, UNIT 1; DRESDEN NUCLEAR STATION, UNITS 1,  
2, AND 3; LASALLE COUNTY STATION, UNITS 1 AND 2; AND QUAD CITIES  
NUCLEAR POWER STATION, UNITS 1 AND 2 RE: APPROVAL OF CHANGES  
TO THE EXELON NUCLEAR STANDARDIZED RADIOLOGICAL EMERGENCY  
PLAN, AND BYRON AND QUAD CITIES STATIONS EMERGENCY PLAN  
ANNEXES (TAC NOS. MC7492 THROUGH MC7502)

Dear Mr. Crane:

By letter dated June 21, 2005 (Agencywide Documents Access and Management System  
Accession No. ML051790238), Exelon Generation Company, LLC and AmerGen Energy  
Company, requested changes to the Byron Station Emergency Plan Annex (EP-AA-1002), the  
Quad Cities Station Emergency Plan Annex (EP-AA-1006), and the Exelon Nuclear  
Standardized Radiological Emergency Plan (EP-AA-1000).

The proposed changes would consolidate the two Joint Information Centers within the State of  
Illinois into a single facility. This consolidation would result in an additional change that  
eliminates three Emergency Response Organization positions.

The U.S. Nuclear Regulatory Commission (NRC) staff has completed its review of your  
submittal and the supporting documentation. Based on its review, the staff concludes that the  
proposed changes meet the requirements of Title 10 of the *Code of Federal Regulations*  
(10 CFR), Section 50.47(b), and Appendix E to 10 CFR Part 50. Therefore, the staff finds that  
the changes are acceptable. The basis for our conclusion is contained in the enclosed safety  
evaluation. If you have comments regarding this matter, please contact Kahtan Jabbour at  
301-415-1496.

Sincerely,

**/RA/**

## 1.0 INTRODUCTION

By letter dated June 21, 2005 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML051790238), Exelon Generation Company and AmerGen Energy Company (the licensees), requested changes to the Exelon Nuclear Standardized Radiological Emergency Plan (EP) and the associated Byron Station and Quad Cities Station EP Annexes. The licensees are proposing changes to the EP that consolidate two Joint Information Centers (JICs) within the State of Illinois into a single facility. This consolidation results in additional changes that would eliminate three Emergency Response Organization (ERO) positions.

The licensees currently use the Morrison JIC for Byron and Quad Cities Stations. The proposed changes centralize the Morrison JIC with the JIC located in Warrenville, Illinois. The Warrenville JIC currently services Braidwood, Clinton, Dresden, and La Salle Stations, as well as being co-located with the licensee's Midwest Emergency Operations Facility (EOF).

Due to the proposed centralization of all Morrison JIC activities in the same facility as the EOF, some of the existing ERO positions associated with performance of EOF and remote JIC functions are no longer necessary and could be eliminated (e.g., JIC Public Information Liaison, and EOF Emergency News Center Technical and Radiological Advisors).

The physical relocation of the JIC only affects the Byron and Quad Cities Stations, while the elimination of ERO positions affects Braidwood, Byron, Clinton, Dresden, La Salle, and Quad Cities.

## 2.0 REGULATORY EVALUATION

The applicable regulations and guidance that the licensees must meet for the EPs are as follows:

### 2.1 Regulations

The underlying purpose of the standards in Title 10 of the *Code of Federal Regulations* (10 CFR), Section 50.47(b), is to ensure nuclear power reactor licensees have emergency response plans that provide reasonable assurance that adequate protective measures will be taken in the event of an emergency at a nuclear power reactor.

The following regulatory requirements are applicable:

10 CFR 50.47(b)(2): “On-shift facility licensee responsibilities for emergency response are unambiguously defined, adequate staffing to provide initial facility accident response in key functional areas is maintained at all times, timely augmentation of response capabilities is available and the interfaces among various onsite response activities and offsite support and response activities are specified.”

10 CFR 50.47(b)(7): “Information is made available to the public on a periodic basis on how they will be notified and what their initial actions should be in an emergency (e.g., listening to a local broadcast station and remaining indoors), the principal points of contact with the news media for dissemination of information during an emergency (including the physical location or locations) are established in advance, and procedures for coordinated dissemination of information to the public are established.”

10 CFR 50.47 (b)(8): “Adequate emergency facilities and equipment to support the emergency response are provided and maintained.”

### 2.2 Guidance

NRC Regulatory Issue Summary 2005-02, “Clarifying the Process for Making Emergency Plan Changes,” dated February 14, 2005, provides guidance to licensees making changes to their EPs.

Sections II.B.6, II.B.7d, II.G.3a, II.G.3b, II.G.4.a, II.G.4.b, II.G.4.c, and II.H.4 of NUREG-0654/FEMA [Federal Emergency Management Agency]-REP-1, Revision 1, “Criteria for Preparation and Evaluation of Radiological Emergency Response Plans and Preparedness in Support of Nuclear Power Plants,” are applicable to this evaluation.

## 3.0 TECHNICAL EVALUATION

The proposed revision to the applicable EPs was evaluated by the licensees to be a potential decrease in effectiveness (DIE). Consequently, the proposed changes had to be submitted to the NRC for approval prior to implementation, as required by 10 CFR 50.54(q).

The evaluation below is based on the NRC staff's review of the licensees' technical and regulatory analysis in support of the proposed EP changes as provided in the submittal dated June 21, 2005.

The licensees stated that the relocation of the Byron and Quad Cities Station JIC to Warrenville offers several enhancements, including closer proximity to Chicago and the major news media outlets, closer proximity to the NRC Region III office, better utilization of existing cellular and wireless communication systems surrounding the Warrenville area, and consolidation of all the licensees' midwest nuclear stations' JIC functions into a centralized location. The licensees provided a letter from the State of Iowa and an e-mail from the State of Illinois (ADAMS Accession No. ML060400343) that document their concurrence with the relocation of the JIC. The NRC staff has determined that this relocation, as stated in the proposal, is acceptable.

The elimination of the following ERO positions was evaluated for impact on the Exelon Nuclear Standardized Radiological EP.

#### JIC Public Information Liaison

The licensees stated that due to the relocation, the need for an extra ERO position to coordinate information flow between the EOF and JIC was removed (note that this responsibility was also redundant to that of the Public Information Director). The responsibility for ensuring that approved news releases and chronological event description logs are made available will be transferred to the JIC Coordinator. The NRC staff verified that this change does not unduly impact the ability of the JIC Coordinator to perform their assigned responsibilities. This change is considered acceptable.

#### EOF Emergency News Center Technical Advisor

The licensees stated that the responsibilities of this position will be transferred to the Technical Spokesperson in the common JIC. The responsibilities of the Technical Spokesperson were evaluated by the NRC staff to ensure that this position was not adversely affected by this proposed change and it was determined that the additional responsibilities of the EOF Emergency News Center Technical Advisor would not adversely impact the performance of the Technical Spokesperson. This change is considered acceptable.

#### EOF Emergency News Center Radiological Advisor

The licensees stated that the responsibilities of this position will be transferred to the Radiation Protection Spokesperson in the common JIC. The responsibilities of the Radiation Protection Spokesperson were evaluated by the NRC staff to ensure that this position was not adversely affected by this proposed change and it was determined that the additional responsibilities of the EOF Emergency News Center Radiological Advisor would not adversely impact the performance of the Radiological Protection Spokesperson. This change is considered acceptable.

#### 4.0 CONCLUSION

The staff performed a review of the proposed changes to the Exelon Nuclear Standardized Radiological EP and the associated Byron Station and Quad Cities Station EP Annexes. As such, the proposed EP changes meet the requirements of 10 CFR 50.47(b). The staff has determined, based on the considerations discussed above, that: (1) there is reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner, (2) such activities will be conducted in compliance with the Commission's regulations, and (3) the approval of the proposed EP changes will not be inimical to the common defense and security or to the health and safety of the public.

The proposed changes to the Exelon Nuclear Standardized Radiological EP and the associated Byron Station and Quad Cities Station EP Annexes, as reflected in the submitted documentation, are acceptable.
