NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

August 3, 1989

MEMORANDUM FOR: Chairman Carr

FROM: Francis X. Cameron
Chairman
LSS Internal Steering Committee

SUBJECT: CHAIRMANSHIP OF THE LSS INTERNAL STEERING COMMITTEE

Now that I have assumed my new responsibilities as Deputy LSS Administrator, I am resigning as Chairman of the LSS Internal Steering Committee effective upon your appointment of a new Chairman. At our last meeting, the Steering Committee discussed who would be best suited to replace me as Chairman of the Committee. The Steering Committee believes that a representative from the Office of General Counsel (OGC) or the Office of the Secretary (SECY) should assume the Chairmanship responsibilities. OGC is currently represented on the Steering Committee by Stuart A. Treby, Assistant General Counsel for Rulemaking and Fuel Cycle. SECY is currently represented by John C. Hoyle, Assistant Secretary. The Committee believes that OGC might provide the most neutral leadership because it will be the least affected by the implementation of the LSS. OGC also had the lead responsibility for the LSS rulemaking. SECY has also been involved in the development of the LSS from the beginning, but would be more affected than OGC by the implementation of the LSS. However, the Committee does not believe that this would interfere with SECY adequately fulfilling the Chairman's responsibilities.

The Committee believes that a key consideration in the selection of the new Chairman will be the ability to devote the adequate time and resources necessary to carry out the Chairman's responsibilities. In this regard, the Steering Committee recommends that the Chairman of the Steering Committee also be designated as the NRC representative on the LSS Advisory Review Panel. These combined responsibilities will require a not insubstantial commitment of time and resources.

If I can be of any further assistance, please contact me.

Chip Cameron
