This fax is in response to your telephone request this morning for the names of individuals authorized to perform the non-routine maintenance discussed in my February 26, 1999 letter to you. We request that the license specifically identify myself (Lawrence Heyd) in Section 17A.

Just to be clear, my understand is as follows:

The license will allow other individuals who have completed proper training to perform the specified non-routine maintenance. The names of these individuals will not be included in the license, but we will have to maintain records of the proper training.

If this understanding is incorrect, please contact me before issuing the license. My telephone number is 804-524-2829.

Thank you for your attention to this matter,  
Lawrence
