To Whom It May Concern:

In response to page 1774 Federal Register - Vol. 71, No. 7 - Wednesday Jan. 11, 2006 I wish to say:

I strongly wish an Independent Safety Assessment be performed ~~along~~ along with a view of a real risk and consequence assessment ~~to~~ measurement in this area of privately owned Vermont Yankee Nuclear Plant in Brattleboro, VT.

Also I wish that in this radically changed world that the positive aspects of wanting to be in and ^{to} lead a positive position in this beautiful country take place now. I am 80 years old and I feel victimized by the fact that we are not being essentially wonderful by not choosing the many ways of developing, working, & economically positive energy position.

It is time we ~~take~~ take control of alternative energy in the Northeast.

Yours,
Anne P. Tobey
