General Manager, Operations  
14440 Twin Cities Road  
Herald, California 95638-9799

SUBJECT: NRC INSPECTION REPORT 72-00011/95-02

This refers to the inspection conducted by Messrs. J. I. Tapia, and J. V. Everett, of this office, on July 10-12, 1995. The inspection included a review of activities related to the construction of an independent spent fuel storage installation authorized for your Rancho Seco Nuclear Generating Station facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress. The results of this inspection are documented in the enclosed report.

The inspectors determined that the reinforced concrete horizontal storage modules for the dry storage of spent nuclear fuel were being constructed in accordance with the applicable drawings, specifications, and quality assurance requirements.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

A handwritten signature in black ink, appearing to read "Thomas P. Gwyn", written over a printed name and title.

Thomas P. Gwyn, Director  
Division of Reactor Safety
