Subject: Allegations Feedback per our meeting earlier

Glenn,
Attached is the information regarding closed OI investigations for the Salem/Hope Creek site over the past two years for inclusion in the Q&A material you are keeping.

Let me know if you have any questions. Thanks.
Leanne

B-5

Since January 1, 2002, the NRC has informed the licensee of the results of three OI investigations involving the Salem and/or Hope Creek facilities. Two of the cases involved investigations of alleged discrimination of staff for raising safety issues. In each case, the NRC was unable to substantiate that discrimination occurred. In the third case, the NRC substantiated that a Nuclear Technical Supervisor deliberately submitted a bogus urine sample during a random drug screen examination. A Severity Level III Notice of Violation was issued to the Nuclear Technical Supervisor.
