Subject: call to UCS (Lochbaum) re: today's letter and Dave's request that we consider...

I informed Dave. he was very appreciative of the info and does not need a copy at this time. He said that he has been working with a group of employees that had lost faith in the system, and had been considering going to 60 minutes, but are not currently planning to do so; Dave said he thought it would be useful for NRC to meet with the employees away from the site at some future time (no big rush). He offered to facilitate. While being noncommittal, i was generally warm to the possibility, and said we could talk later.
