Subject: [NRC_CONCERNS] NRC TELLS PSEG TO FIX SAFETY CULTURE OR ELSE

Hi All -

Below please find a letter from Hub Miller, NRC the CEO of PSEG. It is clear from his letter that there are serious problems at all 3 nuclear plants at Artificial Island. While UNPLUG Salem is very disappointed that the letter did not go further, and immediately shut all three nukes pending a complete investigation, the letter is, for the NRC, a very strong step.

We also disagree with Miller's statement that they have not gathered 'serious safety violations'. The tritium leak itself was a serious violation.

Safety culture at PSEG is poor. We've been saying that for months now. Informants within PSEG have told us this, but have asked that their confidentiality not be compromised.

The NRC investigation is deep and wide-ranging, and we urge the NRC to do the right thing this time, and not allow Salem and Hope Creek to be the "Davis-Besse on the Delaware".

If anyone reading this has additional information about the safety culture at Salem/Hope Creek, please contact us and we will keep your information as confidential as you want it.

thanks
norm cohen
coordinator, UNPLUG Salem Campaign

NUCLEAR SAFETY UPDATE!

The NRC issued the following public letter to PSEG Chairman Jim Ferland on Wednesday. It will be posted on the NRC website and is a public document. The media around the country is being notified.

This is an "unprecedented" step for the NRC to take, not having been done before. It means they have uncovered enough in their ongoing investigation to warrant putting the Chairman of the Board on notice and
