Hub,

I heard you had someone call me at the hotel yesterday morning. I was already on the plane to Chicago at that time. Let me know if you want to talk or if it's a simple question you need me to answer. I heard a rumor that you wanted to ask if Dr. Harvin was at the ECP conference. She was not.

FYI, Lisa Jarriel was discussing the RIC with me Wednesday evening and mentioned that there was some interest in adding the Salem/HC SCWE letter as a possible point of discussion during the SCWE panel at the RIC. She indicated that there has been a surge in licensee interest in how Region I came to the decision to write the letter. As such, she feels that Region I should consider offering someone to be on the SCWE panel at the RIC. I told her I would relay the information to you.

Also FYI....some comments made by Harold Ray, Exec. VP, Southern California Edison (who sponsored the ECP conference) (also a former ANS President) - Mr. Ray referred to "the recent NRC action that has had significant repercussions throughout the industry." During his talk, Mr. Ray stated that "making a conservative decision to shutdown a plant, while it obviously would affect productivity, does wonders in terms of safety culture, because it tells the staff that you are willing to shut the plant down for safety reasons."
