Randy,

The branch has a tentative plan for resolving the Salem White issue prior to September 30, 2004.

I can discuss with you further when I get back to the region.

Eugene W. Cobey, Chief  
Projects Branch 3  
Division of Reactor Projects  
(610) 337-5171

>>> A. Randolph Blough 08/31/04 08:04AM >>>

1. UCS and allegor both gave fairly positive feedback after reading the letters, both placing importance on the dev. memo and enhanced followup plans.

2. PSEG nuclear president (bakken) said "no surprise", and opined that the NRC letters were well-written. Also inquired when we will resolve our internal review of the white issue that we've held open >4 qtrs on salem; Sam committed to get back with him on our schedule

**(Gene cobey for action - let's set a schedule for resolving our internal opinions).**

Bakken said we may get increased attn for Cong LoBiondo: Bakken had met with LoBiopndo last week and the Congressman had said that Markey and Biden were 'letting him' follow Salem/HC SCWE.

**Tom Madden - - do you know the relationship there among biden, markey & LoBiondo, and Bakken's statements should mean to us? are they all on the same committeee or subcommittee, and are there activities upcoming for which we need to ready our senior mgt?**

**Gene & Tom: RSVP.**

thanks to all for helping get the dev memo and mid-cycle letters done - - now we can get to work on the next phases (and, of course, the FOIAs)

regards,  
randy
