Document Control Desk:

The U.S. Department of Energy requests renewal of Nuclear Regulatory Commission Certificate of Compliance USA/9132/B(M)F, T-3. This is one of the few spent fuel casks that will not expire and we need to keep it available. There have been no accidents or incidents involving the T-3 since the last Certificate of Compliance renewal. There are no changes in the packaging design, hardware, or SARP since the last certificate revision.

If you have any questions, please contact James M. Shuler at 301-903-5513.

Sincerely,
