SUBJECT

Quarterly Telephone Contact

SUMMARY

Organization/Staffing Changes:

Jim Scheu is the new RSO as of about one month ago.

New Processes/Activities:

None.

Events/Self-Identified Violations or Safety Concerns:

There were no events/self-identified violations or safety concerns.

The DU shield Serial 002771 remains missing. The licensee plans to have all DU shields at the plant very soon, and it plans to check the entire inventory at that time to identify the lost DU shield.

Radiation Dose Trends:

Jim is in the process of assessing the whole body and extremity dose trends. He noted that the doses in 1/06 will be higher due to cyclotron maintenance.

Major Processing Schedule Changes:

DTE generator production will remain shut-down until sterility testing is completed in about two weeks. Generator production will probably begin in 3/06.

The licensee ceased Xe-133 production due to sterility/stability FDA issues during Thanksgiving week. However, Xe-133 production resumed in early December 2005.

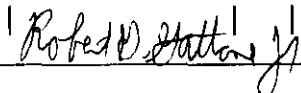

ACTION REQUIRED

Place in ADAMS.
