

March 8, 2006

Mr. Charles S. Williams, President
R.M.D. Operations, LLC
5460 Ward Road Suite 100
Arvada, CO 80002

SUBJECT: YOUR FEBRUARY 13, 2006, LETTER TO CHAIRMAN DIAZ

Dear Mr. Williams:

Chairman Diaz has requested that I respond to your February 13, 2006, letter (ADAMS Accession No. ML060580177). As you note in your letter, the Nuclear Regulatory Commission (NRC) staff has received your license application and commenced a technical review. As you further state, the staff is seeking Commission guidance on the regulatory mechanisms and approaches to be considered when regulating licensable material removed from drinking water at water treatment facilities. When the Commission provides such guidance, to the effect that it impacts your license application, or if there is a change in the status of your application, the NRC staff will contact you. We thank you for the input to the licensing process and comments as to why you believe your licensing approach is preferable to alternative approaches.

If you have any questions regarding this letter, please contact Michael Raddatz of my staff, at (301) 415-6334, or via e-mail to mgr@nrc.gov.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the NRC Website at <http://www.nrc.gov/reading-rm.html> (the Public Electronic Reading Room).

Sincerely,

/RA/

Robert C. Pierson, Director
Division of Fuel Cycle Safety
and Safeguards
Office of Nuclear Material Safety
and Safeguards

Docket No.: 40-9059
