

U.S. NUCLEAR REGULATORY COMMISSION
REGION I
NOTICE OF SIGNIFICANT MEETING

March 10, 2005

Licensee: Entergy Nuclear Northeast

Facility: Indian Point Nuclear Generating Unit 2 and Unit 3

Docket Nos. 50-247 and 50-286

Time and Date: 6:30 p.m. - 10:30 p.m., March 28, 2006

Location: Crystal Bay on the Hudson - Charles Point Marina
5 John Walsh Boulevard
Peekskill, New York 10566

Purpose: The NRC Special Inspection Team, established on September 21, 2005 to assess Entergy's efforts to evaluate the Unit 2 Spent Fuel Pool leakage and the subsequently identified on-site tritium contamination of ground water, has completed its preliminary review. In view of ongoing public interest, the NRC has scheduled this meeting is to provide information based on the NRC inspection effort, Entergy's investigation and assessment of the on-site conditions, and the State of New York's independent monitoring of the groundwater in and around the Indian Point Energy Center. Representatives of NRC, the State of New York, and Entergy will present current assessment information based on activities completed to-date, including radiological assessment of public health and safety and the environment, characterization of the groundwater, and the results from radioanalysis of groundwater samples taken at various on-site and off-site locations. Following the presentations, representatives from the NRC, Entergy, and the State of New York Department of Environmental Conservation will respond to questions.

Attendees*:

NRC: A. R. Blough, Director, Division of Reactor Safety, Region I
M. Gamberoni, Deputy Director, Division of Reactor Safety, Region I
J. White, Chief, Plant Support Branch 2, Region I
J. Noggle, Sr. Health Physics Inspector, Region I
B. McDermott, Chief, Projects Branch 2, Region I
D. Screnci, Senior Public Affairs Officer, Region I

N.Y. State: Department of Health
Department of Environmental Conservation

Entergy: F. Dacimo, Site Vice President
P. Reuben, General Manager Plant Operations
D. Mayer, Director of Special Projects
J. Ventosa, Director of Engineering
J. Comiotes, Director of Nuclear Safety Assurance

Public Participation: The Indian Point Special Inspection public meeting is a Category 3 Meeting. Public participation is actively sought. There will be substantial opportunities during the meeting where public comment and questions will be invited.

Information and correspondence regarding the Indian Point tritium contamination and tritium contamination in general can be found on the NRC web site at the following locations:

www.nrc.gov/reactors/plant-specific-items/indian-point-issues.html

www.nrc.gov/reactors/operating/ops-experience/grndwtr-contam-tritium.html

As indicated on the NRC's web site update dated March 3, 2006, NRC review and radiological assessments thus far indicate that public health and safety has not been adversely affected; and any dose to the public that can be attributed to current onsite conditions is negligible with respect to conservatively established NRC limits. Although licensee activities, NRC oversight, and New York State involvement are continuing, the completion of the NRC Special Inspection is an appropriate milestone for updating the public in a forum near the site. The NRC Special Inspection Team report will be available via the NRC web site prior to the meeting.

Meeting Contact: John R. White, Chief, Plant Support Branch 2
(610) 337-5114
E-mail: jrw1@nrc.gov

- * Handicapped persons requiring assistance to attend the meeting shall make their requests known to the NRC meeting contact no later than two business days prior to the meeting. Attendance by NRC personnel at this meeting should be made known by March 24, 2006, via telephone to the NRC meeting contact.

Approved by: IRA
John R. White, Chief
Plant Support Branch 2
Division of Reactor Safety

Distribution (via E-mail):

Executive Director for Operations, OEDO (RIDSEDOMAILCENTER)
 Deputy Executive Director for Reactor Programs, OEDO (RIDSEDOMAILCENTER)
 Director, Office of Nuclear Reactor Regulation, NRR (RIDSNRROD)
 Associate Director, Office of Operating Reactor Oversight and
 Licensing, NRR/ADRO (RIDSNRRADRO)
 Director, Division of Inspection and Regional Support, NRR/DIRS (RIDSNRRDIRS)
 Director, Division of Operating Reactor Licensing, NRR/DORL (RIDSNRRDORL)
 Project Directorate I-1 (PD1/2), NRR (RIDSNRRDIPMLPDI)
 Asst. General Counsel Materials Litigation and Enforcement, OGC (RIDSOGCMAILCENTER)
 Director, Division of Regulatory Improvement Programs, NRR
 Project Manager, NRR
 S. Collins, RA
 M. Dapas, DRA
 K. Farrar, Regional Counsel
 B. Sosa, RI EDO Coordinator
 D. Screnci, Sr. Public Affairs Officer, RI
 N. Sheehan, Public Affairs Officer, RI
 R. Blough, Director, DRS
 B. Holian, Director, DRP
 M. Gamberoni, Deputy Director, DRS
 D. Lew, Deputy Director, DRP
 R. Laufer, NRR
 J. Boska, NRR
 P. Milano, NRR
 R. Bores, State Liaison Officer, RI
 J. Wray, State Liaison Officer, RI
 R. Marziale, DRP Division Secretary, RI
 K. Gallagher, DRS Division Secretary, RI
 R. Barkley, Technical Communications Assistant, RI
 C. O'Daniell, Deputy Regional Administrator's Secretary
 PMNS

Agenda

NRC Informational Meeting On Spent Fuel Pool
and Tritium Issues Indian Point Energy Center
Category 3 6:30 p.m. - 10:30 p.m.
March 28, 2006

Introduction.....NRC (5 minutes)

Special Inspection Discussion.....NRC (15 minutes)

Spent Fuel Pool and Tritium Issues Discussion.....Entergy (45 minutes)

Short Break.....(5 minutes)

New York State Evaluation and Assessment..... New York State (15 minutes)

Short Break.....(5 minutes)

NRC, New York State, and Entergy to address public questions
on Spent Fuel Pool and Tritium Issues.....NRC (120 minutes)
