> PSEG NUCLEAR NAMES MICHAEL BROTHERS
> AS VICE PRESIDENT - SITE OPERATIONS
>

> A.Christopher Bakken, III to Become Senior Vice President -Nuclear
> Operations

>
>

> PSEG Nuclear president and chief nuclear officer, Roy Anderson, today
> announced the appointment of Michael H. Brothers as vice president-site
> operations. Brothers, who most recently served as a consultant to the NRC
> during its audit of Davis Besse, is recognized as a specialist in worker
> safety and work environment issues.

>

> "Mike brings the benefit of his experience as a first rate, hands-on
> technical operations specialist," said Anderson. "He is widely
> acknowledged in the industry as a superb technician who has also been
> highly successful in implementing safety conscious work environment (SCWE)
> initiatives."

>

> Brothers, 49, will report directly to A. Christopher Bakken, III who
> previously held the position of senior vice president-site operations and
> who will now become senior vice president-nuclear operations reporting to
> Anderson. In addition, both David F. Garchow, vice president-engineering
> and technical support and John Carlin, vice president-nuclear assessment
> will also report to Bakken.

>

> In his new position, Brothers will be responsible for the day-to-day
> management of PSEG Nuclear's Salem and Hope Creek Generating Stations.
> Brothers has experience with both PWR and BWR technologies. His
> appointment becomes effective March 1, 2004.

>

> Anderson said Brothers' appointment will allow both he and Bakken to focus
> more directly on the station's SCWE efforts and the company's commitment
> over the next five years for significant capital improvements to Salem and
> Hope Creek. "Those improvements," said Anderson, "are part of PSEG's
> substantial commitment to the long-term safe operation of the station."

>

> Anderson said the series of management changes at Salem and Hope Creek are
> part of a larger effort to develop longer-term leadership for PSEG's
> nuclear business. "Both Chris Bakken and Mike Brothers are a smart
> investment in the future of this station," said Anderson. "Together,
> along with Dave and John, they bring a level of physical plant management,
> employee safety and operational excellence that is necessary for this
> organization to consistently be among the best performers in the nation."

>

> Brothers has over twenty-five years of technical engineering and
> engineering management experience. He spent fourteen years with Northeast
> Utilities leaving as vice president-operations for Millstone Nuclear
> Station responsible for all aspects of the restart readiness of Millstone
> 2 and 3 following multi-year shutdowns of both units. Prior to that, he
> was the lead start-up engineer for Westinghouse Electric Corporation
> overseeing plant startups across the country. He served in the United
> States Navy as a nuclear officer from 1976-1980. He received a B.S. in
> Engineering Physics from the University of Oklahoma in 1976 and an M.S. in
> Computer Science from Renssalaer Polytechnical Institute in 1989.
> Brothers was licensed as a senior reactor operator.
