PART I.C COMMENTS (Use attached Comments continuation page if required)

The incoming FOIA/PA-2006-0122 request is located in ADAMS at ML060530344.

During a February 28, 2006, conference call with you, Ms. Gigi Rammling of my staff, and members of NRC's Office of Nuclear Reactor Regulation, and staff located in our Region III Regional Office, it was agreed that the NRC would search for responsive records based on the map locations you identified during the call. NRC staff have reviewed the location of the Braidwood discharge line and its path to the Kankakee river. From the site boundary, the discharge line runs north a short distance (estimated at a few hundred yards), and then runs East (approximately 7 miles) to the river. This is away from the location of the property in question, which is several miles north and west of the discharge line. The NRC did not locate any records that pertain to the revised subject request either with the Braidwood site or the Dresden site. Neither did the NRC locate any records pertaining to water sampling on the property as defined in the FOIA.
