

March 9, 2006

Mr. Theodore Sullivan  
Site Vice President  
Entergy Nuclear Northeast  
James A. FitzPatrick Nuclear Power Plant  
Post Office Box 110  
Lycoming, NY 13093

SUBJECT: SENIOR REACTOR OPERATOR INITIAL RETAKE EXAMINATION -  
(FITZPATRICK NUCLEAR POWER PLANT)

Dear Mr. Sullivan:

In a telephone conversation on January 27, 2006, between Mr. Todd Fish, Chief Examiner, and Mr. Steve Reininghaus, Operations Training Superintendent, arrangements were made for the administration of the written retake licensing examination at FitzPatrick Nuclear Power Plant during the week of April 17, 2006.

As agreed during the telephone conversation, your staff will prepare the written examination (25 SRO-only questions) based on the guidelines in Revision 9 of NUREG-1021, "Operator Licensing Examination Standards for Power Reactors." The NRC's regional office will discuss with your staff any changes that might be necessary before the examination is administered.

To meet the above schedule, it will be necessary for your staff to furnish the written examination outlines by February 7. The written examination and the supporting reference materials will be due by March 6. Pursuant to Title 10, Section 55.40(b)(3), of the Code of Federal Regulations (10 CFR 55.40(b)(3)), an authorized representative of the facility licensee shall approve the outlines and examination before they are submitted to the NRC for review and approval. All materials should be complete and ready-to-use.

We request that any personal, proprietary, sensitive unclassified, or safeguards information in your response be contained in a separate enclosure and marked appropriately. Any delay in receiving the required examination and reference materials, or the submittal of inadequate or incomplete materials, may cause the examination to be rescheduled.

In order to conduct the requested written examination, it will be necessary for your staff to provide adequate space and accommodations in accordance with ES-402.

Appendix E of NUREG-1021 contains a number of NRC policies and guidelines that will be in effect while the written examination is being administered.

To permit timely NRC review and evaluation, your staff should submit the preliminary senior reactor operator license application (Office of Management and Budget (OMB) approval number 3150-0090), medical certification (OMB approval number 3150-0024), and waiver requests (OMB approval number 3150-0090) at least 30 days before the examination date.

Mr. Theodore Sullivan

-2-

Because your applicant for this facility written retake examination previously passed the operating test, administered May 19-20, 2005, you may request waivers of that portion. If the application is not received at least 30 days before the examination date, a postponement may be necessary. The signed application certifying that all training has been completed should be submitted at least 14 days before the examination date.

This letter contains information collections that are subject to the *Paperwork Reduction Act of 1995* (44 U.S.C. 3501 et seq.). These information collections were approved by the OMB, under approval number 3150-0018, which expires on June 30, 2006. The public reporting burden for this collection of information is estimated to average 500 hours per response, including the time for reviewing instructions, gathering and maintaining the data needed, writing the examination, and completing and reviewing the collection of information. Send comments on any aspect of this collection of information, including suggestions for reducing the burden, to the Information and Records Management Branch (T-6 F33), U.S. Nuclear Regulatory Commission, Washington, D.C. 20555-0001, or by Internet electronic mail at [BJIS1@nrc.gov](mailto:BJIS1@nrc.gov); and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB-10202, (3150-0018), Office of Management and Budget, Washington, D.C. 20503.

The NRC may not conduct or sponsor, and a person is not required to respond to, a collection of information collection, unless it displays a currently valid OMB control number.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be available electronically for public inspection in the NRC's Public Document Room or from the Publicly Available Records (PARS) component of the NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the Electronic Reading Room page of the NRC's public Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Thank you for your cooperation in this matter. Mr. Reininghaus has been advised of the policies and guidelines referenced in this letter. If you have any questions regarding the NRC's examination procedures and guidelines, please contact Mr. Fish at (610) 337-5369, or me at (610) 337-5183.

Sincerely,

/RA/

Richard J. Conte, Chief  
Operations Branch  
Division of Reactor Safety
