NRC FORM 7 (5-2003) 10 CFR 110		U.S. NUCLEAR REGULATORY COMMISSION		APPROVED BY OMB: NO. 3150-0027		EXPIRES: 05/31/2006	
APPLICATION FOR LICENSE TO EXPORT NUCLEAR MATERIAL AND EQUIPMENT (See Instructions on Reverse)				Estimated burden per response to comply with this mandatory collection request: 2.4 hours. This submittal is reviewed to ensure that the applicable statutory, regulatory, and policy considerations are satisfied. Send comments regarding burden estimate to the Records Management Branch (T-6 E6), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or by internet e-mail to infocollects@nrc.gov , and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB-10202, (3150-0027), Office of Management and Budget, Washington, DC 20503. If a means used to impose an information collection does not display a currently valid OMB control number, the NRC may not conduct or sponsor, and a person is not required to respond to, the information collection.

Ms. Janice Owens
Export/Import Licensing Officer
Office of International Programs
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Ms. Owens:

SUBJECT: APPLICATION FOR LICENSE TO EXPORT NUCLEAR MATERIAL -
U.S. DEPARTMENT OF ENERGY - CHICAGO OFFICE

Enclosed is a completed NRC Form 7, Application for License to Export Nuclear Material and Equipment, for the Chicago Office, U. S. Department of Energy.

As indicated on the license application, the supplier of the material will be Argonne National Laboratory. The intended receiver is the National Atomic Energy Commission of Argentina (CNEA). This license relates to the testing and demonstration of targets for the RA3 reactor and furthers the nonproliferation goals of the U. S. Government.

Attached are hard copies of the NRC 7, additional documentation and the expired license (XSNM03247). These items were faxed to your office on February 15, 2006.

If you have any questions regarding this completed form, please contact me at 630-252-2073.

Sincerely,

Jolene Bissegger
Safeguards and Security Services
Technical and Administrative Services Group

Subject: Export of Low-Enriched Uranium to Argentina

The Reduced Enrichment for Research and Test Reactors (RERTR) program and the Argentine National Atomic Energy Commission (CNEA) are cooperating under a sister Laboratory arrangement, to develop targets and chemical processes for producing fission-product ⁹⁵Mo using low-enriched uranium (LEU). ANL is obligated to provide targets, consisting of uranium-metal foil encapsulated between aluminum tubes, for testing and to provide uranium-metal feedstock for preparation of test targets by the CNEA. We intend to use LEU metal already at ANL and assigned to the RERTR program as feedstock for these targets. None of the exported LEU will be returned to the U.S.

A previous license to CNEA with NRC number XSNM03247 was approved on March 3, 2004. ANL would like to renew this license and extend it to December 31 2007.

Please request Jolene Bissegger (DOE-CH/SSS) to submit an export license application to the Nuclear Regulatory Commission for the export of this LEU. The DOE program manager for the RERTR program, Parrish Staples (NA-212), fully supports this request. Please ask Ms. Bissegger to provide me a copy of the export license application and any cover letter transmitting it to the NRC. In addition, I will need a copy of the license when it is issued.

Here is the particular information you will need for the export license application:

First Shipment Scheduled - [REDACTED]

Final Shipment Scheduled - [REDACTED]

Proposed License Expiration Date - December 2007

Ultimate Consignee - National Atomic Energy Comisión (CNEA) of Argentina, Ezeiza Atomic Center, Buenos Aires, Argentina

RECEIVED OIP
2006 MAR -8 AM 7:25

Ultimate End Use – National Atomic Energy Commission of Argentina for testing and demonstrating targets for the production of molybdenum-99 in the RA3 reactor. This work furthers the nonproliferation goals of the Reduced Enrichment for Research and Test Reactors program.

Description – Uranium, either as metal foil encapsulated in targets or as broken ingots.

Max. Element Weight – [REDACTED]

Max. U-235 Wt.% – [REDACTED]

Max. Isotope Wt. – [REDACTED]

Unit – [REDACTED]

If you need additional information, please call me. Thank you for your assistance in this matter.

QUANTITY

DESCRIPTION OF MATERIALS OR FACILITIES

The licensee is authorized to export [redacted] uranium-235 contained in [redacted] uranium, enriched to [redacted] w/o maximum, in the form of metal foil encapsulated in targets or as broken ingots. 19.95

The license is amended to extend the expiration date from December 31, 2003 to December 31, 2005.

All other terms and conditions remain unchanged.

////////////////////END////////////////////////////////////

Neither this license nor any right under this license shall be assigned or otherwise transferred in violation of the provisions of the Atomic Energy Act of 1954, as amended and the Energy Reorganization Act of 1974.

This license is subject to the right of recapture or control by Section 108 of the Atomic Energy Act of 1954, as amended and to all of the other provisions of said Acts, now or hereafter in effect and to all valid rules and regulations of the Nuclear Regulatory Commission.

THIS LICENSE IS INVALID UNLESS SIGNED BELOW
