Dear Mr. Crane:

In a telephone conversation on March 1, 2006, Mr. G. Graff, Operations Training Manager, and Mr. N. Valos, Senior Operations Engineer, made arrangements for the NRC to inspect the licensed operator requalification program at the Dresden Nuclear Power Station. The inspection is planned for the week of May 15, 2006, which coincides with your regularly scheduled requalification examination cycle. The staff at your facility should prepare and conduct the requalification examinations in accordance with your NRC-approved requalification program.

In accordance with 10 CFR 55.59(c), the NRC may request facility licensees to submit their biennial comprehensive requalification written examinations or annual operating tests as necessary to support the NRC's inspection program needs. In order for the NRC to adequately prepare for this inspection, please furnish the documents listed in Enclosure 1 to the NRC by May 8, 2006. Additionally, to facilitate the efficient conduct of this inspection, please have available on site for review the documents listed in Enclosure 2. Mr. G. Graff has been advised of this request and provided with the name and address of the NRC lead inspector assigned to this inspection.
