RE: Mail Control 138400, request for additional information

Dear Ms Gabriel,

In your request for additional information regarding our recent application, you suggested we consider proposing additional individuals to provide backup coverage for our Authorized User and Authorized Medical Physicists. When the original application was revised, the following response was inadvertently omitted:

Please add Wen-jong Wang to our license as Authorized Medical Physicist (AMP). Mr. Wang was previously listed on NRC license # 37-00554-03 as an AMP. As indicated in our application, vendor and site-specific training will be provided prior to first use. Additional AMP's are being added to this license in a separate application, which has already been mailed.

We are in the process of gathering information from our AU's backup coverage. However, in order to keep from delaying this application, the information will be submitted at a later date, under a separate application.

If you should have any questions or comments regarding this amendment application, please do not hesitate to contact David Weimer, Chief Physicist, at (757) 827-2444 or our Radiation Safety Officer, Sandy Wolff, at (757) 388-3030.

Sincerely,

A handwritten signature in cursive script that reads 'Tamika Jefferson'.
