Re: Crash History for: Converse County Road 31 - Ross Road & Converse Co. Rd. 34

Dear Mr. Park:

Enclosed is the crash history for the above referenced area over a five-year time period, 2000 through approximately July 2005. I also included a Converse county map for your reference.

The crash listing per location provides specific information including: a milepost marker (assume a 2-digit decimal); year and date of crash; time of day; number of persons injured or killed; road and light conditions at the time of crash; highway element involved; collision type when applicable; roadway junction, which identifies intersection involvement; first harmful event; human contributing factors per officer's opinion; vehicle activity prior; direction of travel & vehicle type.

For this crash listing there were 8 total crashes with 3 property damage only crashes, 5 injury crashes and no fatal crashes.

All crash data is provided from reported crashes which met the reporting threshold of \$1000 damage, injury or death. "PDO" crashes signify "Property Damage Only" crashes.

Please feel free to call or e-mail if you have any questions or need additional information.

Sincerely,

A handwritten signature in black ink, appearing to read "Tom".
