U. S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, DC 20555

**Subject: San Onofre Nuclear Generating Station Units 2 and 3  
Docket Nos. 50-361 and 50-362  
Calculation Supporting PCN-521**

**Reference: Letter from Brian Katz (SCE) to the Document Control Desk (NRC) dated December 6, 2005; Subject: San Onofre Nuclear Generating Station Units 2 and 3, Docket Nos. 50-361 and 50-362, Proposed Change Number (PCN) 521, Application To Amend the Technical Specifications To Delete the Requirements For Fuel Handling Isolation Signals and Fuel Handling Building Post-Accident Cleanup Filter Systems.**

Dear Sir or Madam:

By the referenced letter, Southern California Edison (SCE) submitted a request to revise the Technical Specifications for San Onofre Nuclear Generating Station Units 2 and 3 (SONGS 2&3).

The NRC staff has requested a copy of SCE calculation N-4072-001 Revision 6, "Fuel Handling Accident Inside Fuel Handling Building – Control Room & Offsite Doses," to facilitate its review of the submittal. Enclosure 1 provides the requested calculation.

Revision 6 was the latest revision to the calculation at the time of our December 6, 2005 submittal. SCE has subsequently issued Calculation Change Notice (CCN) 9 to the calculation to address the consequences of dropping a fuel transfer cask, in order to support work on the SONGS 2&3 Independent Spent Fuel Storage Installation. CCN-9 is provided in Enclosure 2, in order to provide a complete response to the NRC staff request.

If you have any questions or require any additional information, please contact Mr. Jack Rainsberry at (949) 368-7420.

Sincerely,

A handwritten signature in black ink, appearing to read "B. S. Mallett". The signature is fluid and cursive, with the first name being the most prominent.
