Dear Sir:

**Subject: Byproduct Material License Amendment Request; License Number 29-30390-01; Additional Facility Address and RSO**

SFBC Taylor Technology, Inc. holds a byproduct materials license to possess and use radioactive materials at its location at 107 College Road East, Princeton, NJ 08540. We would like to make two changes to our license.

**Additional Facility**

We herein request to amend our NRC license to include an additional location whose address is 301D College Road East, Princeton, NJ 08540. This additional location is within the same contiguous complex of commercial office and industrial buildings and is about 1000 feet from our present location. The facility includes custom designed modern analytical labs in a single story commercial building. Security will be augmented by an electronic card key entry system. Attached is a floor plan showing the new facility and the laboratory areas which would be authorized for use of licensed material. The white areas indicate where radioactive materials will be handled. This will encompass approximately 12,000 square feet of the total 35,000 square feet of the new facility.

The additional facility will operate under the same radiation safety program as our present facility. Once we are set up and operating in our new facility, our intention would be to decommission our present facility. However, this will be the subject of a future license application.

**Change of Radiation Safety Officer**

Also, we wish to change the designated Radiation Safety Officer (RSO) from Dr. Thomas Oglesby to Mr. Robert White. Dr. Oglesby will continue to be authorized to use and supervise the use of licensed material. Mr. White was the RSO for this license from 1997

through April 2004 and as such he is experienced and well qualified for the RSO position.

Should you need additional information or clarification, please feel free to contact me or Mr. Robert White at (609) 951-0005.

Very truly yours,  
SFBC Taylor Technology, Inc.
