Subject: FW: new RAI on Bolting B.1.12

Donnie,

I believe this is actually just an update of a previously asked question - I'm not sure of the number, but we can discuss Monday... Take care.

- John.

B.1.12 Bolting Integrity

Exceptions to NUREG-1801

The applicant states that "NUREG-1801 indicates that the program covers all bolting within the scope of license renewal including component support and structural bolting. The Oyster Creek Bolting Integrity program does not address structural or component support bolting. The aging management of structural bolting is addressed by the Structures Monitoring Program, B.1.31 and ASME Section XI, Subsection IWE, B.1.27, addresses Primary Containment pressure bolting. Aging management of ASME Section XI Class 1, 2, and 3 and MC support members, is addressed by the ASME Section XI, Subsection IWF program, B.1.28."

Discuss how these alternate programs meet the intent of NUREG-1801 and provide assurance of aging management for the component support and structural bolting.
