

April 13, 2006

Richard S. Goorevich, Director
Office of International Regimes and Agreements
National Nuclear Security Administration
Department of Energy
Washington, DC 20585

Dear Mr. Goorevich:

Thank you for meeting with us on January 6, 2006, to discuss the Louisiana Energy Services (LES) license application for the National Enrichment Facility and your letter dated December 23, 2005. In your letter, based on a review performed by your staff, you recommended that the U.S. Nuclear Regulatory Commission (NRC) remove portions of the LES license application from its public website because those portions might contain Export Controlled Information. During our January 6, 2006, meeting, your recommendation was discussed and, ultimately, it was agreed upon that the license application should remain publicly available in its entirety.

As was recognized by those in attendance at the meeting, the LES license application has been publicly available on the NRC's website for more than two years. Much of the information in the license application is similar to information that was previously published in connection with an earlier LES license application, which was later withdrawn. Given that the information contained in the current LES license application has been widely disseminated, and given that the NRC is conducting a public licensing hearing on the application, it was agreed upon that the LES license application should remain publicly available.

Thank you again for your efforts. If you have any questions, please contact me at (301) 415-7213.

Sincerely,

\RA\

Robert C. Pierson, Director
Division of Fuel Cycle Safety
and Safeguards
Office of Nuclear Material Safety
and Safeguards
