**SUPPLEMENTARY INFORMATION:**

The U.S. Nuclear Regulatory Commission (NRC or the Commission) has issued Amendment No. 6 to Special Nuclear Materials License SNM-2509 held by Portland General Electric Company (PGE) for the receipt, possession, transfer, and storage of spent fuel at the Trojan Independent Spent Fuel Storage Installation (ISFSI), located in Columbia County, Oregon. The amendment is effective as of the date of issuance.

By application dated May 23, 2005, PGE requested to amend the Trojan ISFSI license (SNM-2509) to revise the methodology applied in the Final Safety Analysis Report. The application requested NRC's review and approval of revised methodology used to determine the controlled area boundary for the Trojan ISFSI and reduce the controlled area from 300 meters from the edge of the pad to 200 meters from the edge of the pad. This amendment

complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

In accordance with 10 CFR 72.46(b)(2), a determination has been made that the amendment does not present a genuine issue as to whether public health and safety will be significantly affected. Therefore, the publication of a notice of proposed action and an opportunity for hearing or a notice of hearing is not warranted. Notice is hereby given of the right of interested persons to request a hearing on whether the action should be rescinded or modified. Also in connection with this action, the Commission performed an Environmental Assessment and determined that a Finding of No Significant Impact was appropriate for this action.

**FURTHER INFORMATION:**

The NRC has prepared a Safety Evaluation Report (SER) that documents the information that was reviewed and NRC's conclusion.
