Subject: Re: Fwd: Update on Braidwood Tritium Issue

App. B (17)

Thanks, Cathy. In the spirit of internal communications, this type of information would be appropriate to share with Mike and his HP folks. Their normal link is back through the HP inspectors in the region, so you might have new information for them.

Likewise, Mike, you and your folks need to maintain a sensitivity to relaying plant-specific information back to the projects folks.

Should we hold hands and sing now?

fyi

I asked Mindy for an update on the H-3 issue. I found the attached interesting and thought I would forward it for your reading.

I have a copy of the slides brought down to you. It provides overview of what Exelon is doing.
