SUBJECT: DRESDEN NUCLEAR POWER STATION, UNITS 2 AND 3 - CORRECTION OF  
TYPOGRAPHICAL ERRORS IN ISSUANCE OF AMENDMENTS TO THE  
TECHNICAL SPECIFICATIONS AND THE RENEWED OPERATING LICENSE

Dear Mr. Crane:

We recently found typographical errors in the following amendments issued by the Nuclear Regulatory Commission (Commission):

Amendment to Renewed Facility Operating License (FOL) No. DPR-19 for Dresden Nuclear Power Station (Dresden), Unit 2, issued on February 17, 2006, used an incorrect amendment number of 210 instead 218. Additionally, the issue date on the amended FOL page was also incorrect.

Amendment numbers 206 and 198 to FOL No. DPR-19 and DPR-25 for Dresden, Units 2 and 3, respectively, issued on February 18, 2004, inadvertently deleted information from the revised technical specification (TS) page 3.3.6.1-5 unrelated to the subject of the amendments. The accompanying revised Quad Cities TS page was not affected.

The errors, inadvertently introduced, are corrected in the enclosed Dresden, Unit 2, Renewed FOL, page 8, and other associated pages included in the February 17, 2006 letter. A corrected copy of the Dresden, Units 2 and 3, TS page 3.3.6.1-5 is also enclosed. The Notice of Issuance published in the Commission's biweekly *Federal Register* notice on March 14, 2006 (71 FR 13185), regarding the Renewed FOL amendment is also being corrected.

Sincerely,

SAFETY EVALUATION BY THE OFFICE OF NUCLEAR REACTOR REGULATION

RELATED TO AMENDMENT NO. 218 TO RENEWED FACILITY OPERATING

I

LICENSE NO. DPR-19

EXELON GENERATION COMPANY, LLC

DRESDEN NUCLEAR POWER STATION, UNIT 2

DOCKET NO. 50-237

1.0 INTRODUCTION

By letter to the Nuclear Regulatory Commission (NRC, Commission), dated February 25, 2005 (Agencywide Documents Access and Management System Accession Number ML050600047), Exelon Generation Company, LLC (the licensee) requested changes to the Renewed Facility Operating License for Dresden, Unit 2. The proposed amendment would delete Section 2.G of the Renewed Facility Operating License (RFOL) that requires reporting of violations of the requirements in Section 2.C of the license. A notice announcing the availability of this proposed change using the consolidated line item improvement process (CLIIP) was published in the *Federal Register* on November 4, 2005 (70 FR 67202). The licensee's application was used during the development of the CLIIP notices and is being evaluated using that process even though the application predates the notice of availability.

2.0 REGULATORY EVALUATION

The NRC staff finds that the licensee, in Section 5.2 of its submittal, identified the applicable regulatory requirements.

Conditions were included in the facility operating licenses (FOLs) issued to some nuclear power plants requiring the licensee to make reports to the NRC regarding violations of other sections of the operating license (typically Section 2.C). Such a license condition typically reads as follows:<sup>1</sup>

Except as otherwise provided in this license and its appendices, the licensee shall report any violations of the requirements contained in Section 2.C of this license in the following manner: initial notification shall be made within 24 hours to the NRC Operations Center via the Emergency Notification System with written followup within 30 days in accordance with the procedures described in 10 CFR 50.73 (licensee event report system).

---

<sup>1</sup> Condition 2.G in the Renewed Facility Operating License for Dresden Unit 2 is similar to the standard language.
