March 28, 2006

Environmental Assessment Related to Issuance of a License Amendment
of U.S. Nuclear Regulatory Commission Materials License No. 45-25288-01,
Multipixel Systems, Inc. in Ramsey, New Jersey

Introduction

The U.S. Nuclear Regulatory Commission (NRC) has prepared this environmental assessment (EA) of the amendment of Multipixel Systems, Inc.'s Materials License Number 45-25288-01, and the release of its Ramsey, New Jersey site for unrestricted use. The facility is operated by Multipixel Systems, Inc. in Ramsey, New Jersey. Multipixel Systems, Inc. was authorized by NRC from July, 1999 to October, 2003 to use radioactive materials for research and development and instrument calibration purposes at the site. In 2003, Multipixel Systems, Inc. ceased operations with licensed materials at the Ramsey, New Jersey site, and requested that NRC release the facility for unrestricted use. Multipixel Systems, Inc. has conducted surveys of the facility and determined that the facility meets the license termination criteria in Subpart E of 10 CFR Part 20. The NRC staff has evaluated Multipixel Systems, Inc. request and the results of the surveys, and has developed an EA in accordance with the requirements of 10 CFR Part 51. Based on the staff evaluation, the conclusion of the EA is a Finding of No Significant Impact (FONSI) on human health and the environment for the proposed licensing action.

Multipixel Systems, Inc. requested release for unrestricted use of the building at 150 Hilltop Road, Ramsey, New Jersey as authorized by the NRC License No. 45-25288-01. The building is 11,103 square feet of general office and laboratory space located in a commercial area.

The facility at 150 Hilltop Road, Ramsey, New Jersey was added to License No. 45-25288-01 in July, 1999. NRC-licensed activities performed at the Ramsey, New Jersey site were limited to instrument calibration using Cobalt-60 and Cesium-137 and storage of tritium in glass ampules. No outdoor areas were affected by the use of licensed materials.

The Proposed Action

The proposed action is to amend Materials License No. 45-25288-01 and release the facility at 150 Hilltop Road, Ramsey, New Jersey for unrestricted use. By letter dated November 23, 2005, Multipixel Systems, Inc. stated that no further actions are required to remediate the facility, and requested release of the facility for unrestricted use. Multipixel Systems, Inc. stated that licensed activities ceased completely in October 2003. Based on the licensee's historical knowledge of the site and the conditions of the facility, the licensee determined that only routine decontamination activities, in accordance with licensee radiation safety procedures, were required. A decommissioning plan was not required to be submitted to the NRC. The licensee surveyed the facility, decontaminated or remediated areas as needed, and provided documentation that the facility meets the license termination criteria specified in Subpart E of 10 CFR Part 20, and does not require additional decommissioning activities to be performed. The licensee demonstrated this using the screening criteria described in 65 FR 37186.

Need for the Proposed Action

The purpose of the proposed action is to amend NRC Materials License No. 45-25288-01, to allow for the release of the facility at 150 Hilltop Road, Ramsey, New Jersey for unrestricted use. The licensee needs this license change because it no longer plans to conduct licensed activities at this facility. NRC is fulfilling its responsibilities under the Atomic Energy Act to make a timely decision on a proposed license amendment for release of facilities for unrestricted use that ensures protection of public health and safety and the environment. The licensee has requested the action to reduce their regulatory burden since they no longer intend to conduct licensed activities at this location.

Environmental Impacts of the Proposed Action

The affected environment was described in the Introduction. The licensee has completed all remediation at the site. The NRC staff has reviewed the surveys performed by Multipixel Systems, Inc. to demonstrate compliance with the 10 CFR 20.1402 license termination criteria. Based on its review, the staff has determined that the affected environment and environmental impacts associated with the release for unrestricted use of the Multipixel Systems, Inc. facilities are bounded by the impacts evaluated by the "Generic Environmental Impact Statement in Support of Rulemaking on Radiological Criteria for License Termination of NRC-Licensed Nuclear Facilities" (NUREG-1496). The staff also finds that the proposed release for unrestricted use of the Multipixel Systems, Inc. facilities is in compliance with Title 10, Code of Federal Regulations, Part 20.1402, "Radiological Criteria for Unrestricted Use." The NRC has found no other activities in the area that could result in cumulative impacts.

Environmental Impacts of the Alternatives to the Proposed Action

Since the facility at the Ramsey, New Jersey site has already been surveyed and found acceptable for release for unrestricted use, the only alternative to the proposed action of amendment of the license and release of the 150 Hilltop Road, Ramsey, New Jersey site for unrestricted use is denial of the proposed action (i.e. no action). Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Agencies and Persons Consulted

The NRC staff has determined that the proposed action will not affect listed species or critical habitat. Therefore, no further consultation is required under Section 7 of the Endangered Species Act. Likewise, the NRC staff have determined that the proposed action is not the type of activity that has the potential to cause effects on historic properties. Therefore, no further consultation is required under Section 106 of the National Historic Preservation Act.

NRC provided a draft of its Environmental Assessment to the State of New Jersey Department of Environmental Protection for review. On March 8, 2006, the Department of Environmental Protection responded by letter and agreed with the conclusions of the EA.

Conclusions

Based on its review, the NRC staff has concluded that the completed action complies with 10 CFR Part 20. The NRC staff have prepared this EA in support of the proposed action to amend License No. 45-25288-01. On the basis of the EA, NRC has concluded that there are no significant environmental impacts and the license amendment does not warrant the preparation of an Environmental Impact Statement. Accordingly, it has been determined that a Finding of No Significant Impact is appropriate.
