Subject: Louisiana energy services and insurance companies

Several insurance companies have responded to this letter. I did add a note to this that state of new mexico officials were ignoring the high winds in this area to get the plant licensed. And I enclosed an emission list.
I also added a note that the NRC had "no response" to my letter.

Subject:

The NRC is charged with nuclear safety to the public.
In respect to the licensing of the Louisiana Energy Services uranium enrichment plant in Lea County, NM, its my allegation that NRC officials are ignoring the high winds we have in this area to expedite the licensing process of the enrichment plant.

The NRC study of winds in this area state that high winds are "rare."
I present data from a NOAA web page for January 1 & 2 of 2006. (On January 1, wind driven fires burned up 22,000 acres of land, 11 homes , two businesses and 10 vehicles.)
I also present a 2005 picture from the Hobbs News-Sun showing mention of wind speeds of 75 mph in Hobbs .

To license a uranium enrichment plant which would vent carcinogenic emissions into high winds which would carry them over populated areas would endanger the public health

My second allegation is that NRC officials are withholding the emergency plan for the Les uranium enrichment plant from the public to facillate the licensing of the plant. In case of an emergency at the proposed LES plant no one down wind of the plant would know what to do. This would place the public at risk.

For the public good , I will also forward this letter onto insurance companies that do business in the state.

MICHELLE A. FORTNEY/SUN

Gusty day

Wind gusts of up to 75 mph snapped a tree Tuesday and dropped the broken trunk on a Honda parked in front of the home of Hobbsan Eddie Taylor.
