SUMMARY

We have received your letters dated December 12, 2005, and January 6, 2005, requesting an amendment to your byproduct materials license. You have requested that the licensing action under control number 315082 be expedited. Please be reminded that the expedite mechanism must be reserved for special circumstances only because granting your expedited request will require a delay in review of other licensing actions that we received prior to receipt of your licensing action. Normally, we review licensing requests in the order of receipt to ensure fairness and timely reviews.

Please prepare a written response to the following so that we may determine whether an expedite should be granted for the licensing action under control number 315082 :

Please be specific but do not include personal or proprietary information that we must protect, pursuant to 10 CFR 2.390. Please explain whether the circumstances creating the request for an expedite were unforeseen.
2. Please state the date or date range when you are requesting that the licensing action under control number 315082 be reviewed by. Please note that "as soon as possible" or similar terminology, will not be acceptable.

For future planning, please be reminded of the following notes that were included in the acknowledgment letter/postcard you should have received for this action:

(***)

- **New and amendment actions are normally processed within 90 days, unless the technical review identifies major deficiencies, or policy issues requiring input and coordination with other offices.**
- * **Renewal actions are normally processed within 180 days. However, under timely filing (before expiration) your license will not expire until final action has been taken by this office.**
- * **Termination actions are normally processed within 90 days, unless confirmatory surveys after decontamination/decommissioning activities are involved.**

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

ACTION REQUIRED
