Docket 50-255
License No. DPR-20

Annual Update of the Application for Renewed Operating License for the Palisades Nuclear Plant

In a letter dated March 22, 2005, Nuclear Management Company (NMC) submitted an Application for Renewed Operating License for the Palisades Nuclear Plant (LRA). Subsequent to submittal of an LRA, 10CFR54.21(b) requires that the application be updated annually to reflect changes to the Current Licensing Basis (CLB), since the time of submittal, that materially affect the LRA contents, including the Final Safety Analysis Report (FSAR) supplement.

NMC has completed a review of pertinent documentation. No changes to the CLB were identified that materially affect the LRA, including the FSAR Supplement. In addition, no changes were identified that would require an update to the Environmental Report submitted in conjunction with the LRA.

Please contact Mr. Robert Vincent, License Renewal Project Manager, at 269-764-2559, if you require additional information.

Summary of Commitments

This letter contains no new commitments or revisions to existing commitments.

I declare under penalty of perjury that the foregoing is true and correct. Executed on March 21, 2006.

A handwritten signature in black ink, appearing to read "Paul A. Harden", written over a horizontal line.
