**Subject:** tnt - reporter query on waste exemptions

AP in Texas called for some clarification regarding our reviews of requests by two decommissioning plants, Yankee Rowe and Haddam Neck, to send demolition debris to Waste Control Specialists in Texas under 10 CFR 20.2002. We explained that the requests are to exempt the material from further regulatory control, so they could be disposed of as hazardous waste, rather than low-level radiological waste. We also updated the timing of the reviews for completion - YR within 2 weeks, Haddam Neck at least 30 days out.
