SUBJECT: HOPE CREEK GENERATING STATION - CORRECTION TO AMENDMENT  
NO. 165 TECHNICAL SPECIFICATION PAGE (TAC NO. MC8605)

Dear Mr. Levis:

On April 4, 2006, the Nuclear Regulatory Commission (NRC) staff issued the subject amendment in response to your application dated October 11, 2005. The amendment revised certain 10-month Technical Specification (TS) surveillance requirements to eliminate the condition that the testing be conducted during shutdown conditions.

Subsequent to the issuance of the amendment, your staff identified an error in TS Page 3/4 3-31. This error resulted from the NRC staff's review of two amendment requests that propose changes to the same TS page. The NRC staff had inadvertently made the correction to the TS page for the second amendment request, for which an amendment has yet to be issued. The corrected page is enclosed. We apologize for any inconvenience this may have caused.

Sincerely,

*/RA/*
