Subject: Braidwood Groundwater

I recommend that you form a "Braidwood Groundwater Task Force" comprising the DRP BC, Orth, Lickus and Strasma - this issue will probably get very big and we should be proactive - the group should develop a cocise statement of the issue and its cause, a plan of action (including briefings, point of contact, past and present inspection activities...), a communications plan and a set of Q and A's - we'll need to do this today/tomorrow
