Subject: Re: Fwd: Green Ticket (URGENT) INITIATION

Mark - Steve Orth will be collecting this information for Region III. We need to provide input to NRR today. His group is looking back as well.

Anne T. Boland, Deputy Director
Division of Reactor Safety
NRC Region III
630-829-9701

i know that we pulsed the sites a couple of months ago on any history of sfp leaks. looks like nrr has been asked to report any recent occurances where tritium has been discovered in unrestricted areas. pls make yourselves aware of any at your facilities and be prepared to assist nrr, if we get quired.
