REPORT OF INTERVIEW

WITH

On August 27, 1996, [] was interviewed by Nuclear Regulatory Commission (NRC), Region IV (RIV), Office of Investigations, Special Agent Robert J. Kirspel, and NRC:RIV Senior Health Physicist, Linda McLEAN, regarding allegations of possible falsification of documents at United Nuclear Corporation (UNC).

[] stated his date of birth is [] and his current telephone number is [] [] stated he worked for UNC from [] when he was laid off. [] stated he was rehired by UNC in [] and is currently employed as a []

[] stated he recalled a problem with decontaminating a rake shaft at UNC that was to be shipped to a company in Canada. [] stated he knew that "swipe tests" were done on the rake shaft. [] stated the rake shaft was eventually cleaned to an acceptable level and was checked by UNC employee, [] or UNC manager, [] before it was released.

[] stated he could not recall signing a UNC Training Record which would have shown that he received training on how to use various survey instruments. [] stated he did not receive much training but did know how to read a survey meter.

[] stated he recalled using a vacuum cleaner to clean an area on UNC property where some resin had been spilled. [] stated he also used a shovel to pick up the remaining contaminated dirt.

[] stated that former UNC employee, [] told him that unidentified fluids, other than authorized oil, had been dumped into UNC's fuel storage tank. [] stated he had no additional information concerning []'s comment, but did know that some company [NFI] obtained the oil and analyzed it before they left the site.

[] stated he had been directed to gather exposure records for various UNC employees and placed them in one room at UNC. [] stated he was not aware of any exposure records that had been thrown away.

[] stated he was not aware of any wooden staves that had left UNC without first being decontaminated.

This report prepared on September 4, 1996, from special agent's notes.
