0920 Commenced counting air perimeter filter samples for employee exposure to airborne particulates. Counts/calculations are as follows:

SITE	START	END	COUNTS	Calc. (activity $\mu\text{Ci}/\text{m}^3$ )
① blank	0920	1010	26	$0.52 \text{ E-15}$
② precip	1010	1100	268	$7.58 \text{ E-15}$
③ scale H.	1100	1150	129	$3.17 \text{ E-15}$
