Mr. Nader Mamish, Director
Emergency Preparedness Directorate
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Mamish:

The State of Arizona requests 60 bottles of liquid Potassium Iodide for use by infants and children if radioactive iodine is released during an emergency at the Palo Verde Nuclear Generating Station. We estimate an infant – child population of around 600 within 10 miles of the plant site. Please ship the supplies to the undersigned at the address in the letterhead. We have developed a plan for the distribution should an event occur at the nuclear site.

Thank you for your support and efforts in this program.

Sincerely,

Aubrey V. Godwin, Director
Arizona Radiation Regulatory Agency
