Indian Point Energy Center Daily Status Report

November 17, 2005

Operational Status

Indian Point Unit 2 is operating at 100% and has been online 348 days.

Indian Point Unit 3 is operating at 100% reactor power and has been on-line for 44 days.

NRC and IPEC Meet on Sirens

Last evening, representatives from the Nuclear Regulatory Commission, FEMA and Indian Point Energy Center met to discuss the provisions of the Energy Act of 2005 and its impact on IPEC's siren system. Region I Director Sam Collins and representatives from the NRC began the program with a description of the portion of the Energy Act that pertains to back up power systems for alert and notification systems.

The NRC public meeting on backup power for sirens at Indian Point was held at Crystal Bay in Peekskill, N.Y.

This was followed by IPEC's presentation of plans for system upgrades that will meet the Policy Act and the NRC's confirmatory orders, which will be issued in January 2006. Frank Inzirillo, Indian Point emergency planning manager, reported on Entergy's program to address issues with the current siren system. About 75-80 people attended the meeting with a significant number of representatives from federal, state and local emergency response organizations. A public comment period was held following the presentations.

Spent Fuel Pool Investigation

Entergy is continuing the investigation into a leak from a small hairline crack in the IP2 spent fuel pool. Divers are in the spent fuel pool today to perform a vacuum box test on one of the potential defects identified during the video inspection.

Previously a diver was in spent fuel pool to install a vacuum box over two areas where potential flaws were identified as part of the spent fuel pool liner inspection. No leakage was detected in this test.

Entergy has drilled the first of the new wells to be installed on site as part of the

tritium investigation. This well is in the IP2 spent fuel pool loading bay. Eight additional wells are planned in this phase of the investigation.

The NRC is continuing its special inspection on the spent fuel pool issue and is continuing conference calls to brief stakeholders.

Entergy Adds New Feature to Website

Entergy has added an e-mail update feature to its safesecurevital website. You can sign up for updates on a variety of topics including siren tests, security upgrades and environmental issues.

To receive these updates go to www.safesecurevital.org and provide an email address.

Updated Dry Cask Storage Factsheets Available

Entergy has produced an updated informational brochure, available in electronic and hardcopy format that explains the details of dry cask storage. Contact Andrea Blizard at 914-271-7081 or by return email at kmcmull@entergy.com for a copy.

Entergy Nuclear Northeast provides customized outreach education programs for schools, youth groups, and civic organizations. The topics we cover include Emergency Planning, Understanding Radiation, Nuclear Fuel and a general overview of the operations of Indian Point Energy Center. If you would like a brochure or are interested in scheduling a program, contact IPEC Communications at 914-271-7441.

If you have any questions or need clarification of the information provided, please contact Kathy McMullin, manager of communications, Indian Point Energy Center, at 914-271-7132.
