Subject: H-3 Results for additional Manholes

Bill,

I am following up on Friday's notification of H-3 in Manhole #6 in the transformer yard. At that time you stated that the manholes up and down gradient had been sampled, and the data should be available Monday. Do you know what the status of that analytical data is?

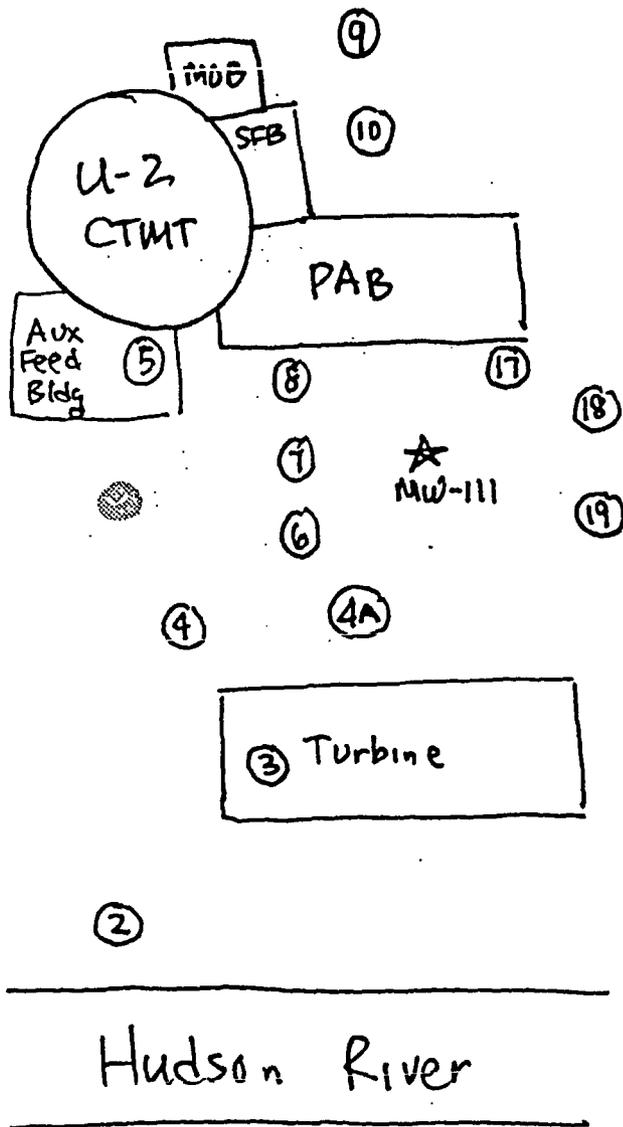

Also, I had phone conversation with Mr. John White of the NRC about the pending notification of the stakeholders re: a Wed conf call on this subject. During that call he asked if you could cc him on your response regarding data availability. His e-mail address is jrw1@nrc.gov <mailto:jrw1@nrc.gov> .

Thanks,

Tim
