Tomas,

Can I get an electronic copy of the SS&D you issued for our sources on March 17th? I would like to have an electronic copy on file and with the SS&D page down I am not sure how else to get it?

Also, when the Import/Export licensing rules go into affect will we have to amend this SS&D to reference our Specific Import/Export license? We have been to a couple NRC meetings regarding this topic and expect to see the licensing requirement later this year. Until then we intend to ship sources under the general license in 110.23 but these sources will exceed the trigger for requiring a specific license. I guess the SS&D could be referenced in the specific license when it is issued. Any idea how this is going to work?

Thanks

John J. Miller, CHP
