Subject: RE: FW: International Isotope Inc. Source List

Tomas,

We are involved in ISSPA, Steve Laffin attended the initial meeting held in Vienna this April.

John,

I will take a look for them.

I actually tried calling your office yesterday because I had a request from my branch chief, he was inquiring to see if there were any trade organizations for source manufacturers. Searching on the internet I found the International Source Suppliers and Producers Association (ISSPA). I saw that International Isotopes, Inc. was a member. Are you involved in this organization, is there any additional information besides what is on the website, are there any other similar associations?

Thanks,

Tomas

Tomas,

Could you please provide me with electronic copies of the SS&Ds listed in my email to Jackie Cook? No rush, would like to have them before the amendment is issued.

Thanks

John

Thank you Mr. Miller for the information. Since you did give me the manufacturer AND model number, I can look up these sources myself in the SSD Registry to make sure that they have been evaluated.

Thanks again for your prompt response. It takes 90 days to complete an

D-7

amendment licensing action; however, you may receive your amendment prior to the 90 day due date.

If additional information or clarification is needed on the above, please don't hesitate to contact me at your convenience.

Thanks,

Jackie,

I received the following list from Foss Therapy this afternoon. It isn't as long and cumbersome as I was lead to believe.

Neutron Products NPTT series all cobalt 60 therapy units

Nordion C-146 C-151 all cobalt 60 therapy units

Nordion C-188 all cobalt 60 research units

Nordion C-161 C-440 GC 40 Cesium 137 research unit

Nordion C-1000 C-3000 and RAMCO 50 GC 1000 and 3000 Cesium 137 research units

JLS&A 7810 all cobalt 60 research units

JLS&A 6810 all cesium 137 research units

I will contact Tomas Herrera at NRC HQ to begin collecting SS&Ds for these sources.
