Subject: NARM SS&Ds

Tomas,

Not sure if we where possible the first NRC Licensee to have an SS&D include NARM. I was wondering when we should begin the process of transferring our other NARM only SS&Ds from Texas BRC to US NRC. I was also in the process of submitting another NARM SS&D to the State of Texas. This is a Co-57 line source SS&Ds, would the NRC be willing to review this SS&D now in an effort to save the time of reviewing in later?
