The purpose of this modification is to modify the web-cast system to allow viewers of NRC Live Archived webcasts to access the web-casts using Port TCP 554. As a result, the contract ceiling amount is increased by \$950.00 from \$258,800.00 to \$259,750.00. Accordingly, the contract is hereby modified:

1. Section B, Subsection B.5 CONSIDERATION AND OBLIGATION, paragraph (a), first sentence, is deleted in its entirety and substituted with the following in lieu thereof:

"The total estimated amount of this contract (ceiling) for the products/services ordered, delivered, and accepted under this contract is \$259,750.00."

2. Section C, STATEMENT OF WORK, Task 2, Develop/Host Webpage and Provide Maintenance & Support, is modified to include the following sub-task:

The Contractor shall complete the transfer from the current Port 8383 to TCP 554 within seven (7) calendar-days of receiving approval from the NRC PO to begin the work. NRC intends to schedule this work during a period when the Commission is not likely to schedule a Live webcast for several weeks.

The Contractor shall notify the NRC PO upon completion of this system modification in order for the Government to perform acceptance testing of the updated system, including a test live webcast. The NRC reserves the right to use external webcast viewers such as other Government personnel (i.e. staff at the Department of Energy (DOE), etc.) in addition to NRC staff, to verify whether viewers can access NRC webcasts using the TCP 554 Port.

Should NRC identify any system performance problems during acceptance testing, the Contractor shall correct the problem within 48-hours of the Contractor receiving notification of the problem from the NRC PO."
