OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

ALERT-Comments Needed on Secretary,

Good Afternoon. The NRC proposal to make no upgrades to existing security requirements for nuclear facilities is unacceptable in the face of the current terrorist environment. The potential consequences of a successful attack on a nuclear site is astronomical. 19 attackers were involved in 9/11 and those unexpected attacks came from the air. It is unacceptable to exempt air attacks from the kinds of threats reactors must be capable of defending against. There should be protection against at least 19 attackers and construction of "Beamhenge" shields so planes crash into the shields, not the reactor facilities.

Congress ordered NRC to include in any rulemaking consideration of 9/11-level threats, attacks by large groups, and attacks by air. NRC has defied Congress in this rulemaking by failing to consider any of these matters.

Thank you for listening

Caryn McGraw
