Subject: question to Mr. johnson and Mr. farquhar about Les emissions with NMENV source noted.

I have a question for Mr Johnson of the NRC and Mr. Farquhar of Governor Richardson's office.

I ran across this Dust presentation by the Air Quality Bureau of the State of New Mexico.

It mentions high winds and high dust Levels in Lea County.

The Les plant will emit the emissions U234, U235, U236, and U238 into these weather conditions.

What is the potential for atmospheric dust particles in these conditions to contain radioactivity?

(Since Ive been interested in this , Ive noticed that wind speeds of 21 mph will get blowing dust warnings in this area.)

Phillip barr
Lea County
