Licensing Division
1901 Constitution Avenue
Washington, D.C.

SUBJECT: Source Material License No. C-2734

Dear Mr. Johnson:

Our License C-2734 issued October 9, 1956, which expires November 1, 1957, specifically authorizes the receipt of 2000 pounds of normal uranium hexafluoride. We request that this license be amended to allow us to receive a total of 7000 pounds of normal uranium hexafluoride during the course of the license.

This material or any part thereof will be used by us for conversion to uranium oxides or other uranium compounds for which we have manufacturing authorization and will be sold to persons authorized by the Atomic Energy Commission to receive such material. In all cases, we receive from our customer the number and/or a copy of their AEC license to be certain that the material does not go to unauthorized individuals.

Since we are nearly out of stock of normal assay material authorized under our present license, we request your early action on this amendment since we desire to place an order with Oak Ridge as soon as possible for additional material. To facilitate our being in a position to order at the earliest possible date, we would appreciate notification by phone or telegram as soon as action is taken on this request.

Very truly yours,

John G. Moore
